MicroTrack Lead-In Cable Assembly Repair Kit

The MicroTrack Lead-In Assembly Repair Kit is used to repair a damaged lead-in cable that is attached to the MicroTrack buried sensor cable. A damaged lead-in cable can-not be spliced. It needs to be replaced entirely to maintain integrity.

The MicroTrack Lead-In Assembly Repair Kit includes: one lead-in cable assembly with factory installed TNC connector and ferrites, one enclosure, one enclosure lid, one strain relief, one piece of heat shrink, one small splice crimp, one large splice crimp one bag of encapsulant potting compound and installation instruction (57A45909-A01).
